Apple Media Services: External Purchase Token Generation History

July 2025

File name External Purchase Token Generation History.csv

File description A history of external purchase tokens Apple generated for a user, which includes details such as the creation date, expiration date, and associated metadata.

Why Apple keeps this information Apple retains this data to enable developers to report commissionable purchase amounts resulting from users' purchases outside of Apple platforms.

Field Name	Details
Apple ID Number	Apple account identifying number
Application Name	Name of the customer app downloaded or updated
Creation Date	Date and time (UTC) in milliseconds, when the token was created
Last Modified Date	Date and time (UTC) in milliseconds, when the token was modified
Purchase Token ID	Identifier of an external purchase token period associated with a user's download or update of an app
Token Expiration Date	Date and time (UTC) in milliseconds, when the token will expire
Token Type	Type of token, (e.g., Acquisition, Services)
Token Version	The external purchase token period version
